

SPRAYNURSE

THROAT - GUT - TOPICAL

DISINFECTANT

PRODUCT GUIDE & DIRECTIONS FOR USE

THROAT INFECTIONS & ALLERGIES:

Gargle with 10ml SprayNurse & spray a few squirts of SprayNurse directly into the mouth & throat 2-3 times daily. Drink 10ml of SprayNurse daily to assist the body to fight and prevent bacterial and viral infections.

TICKLY THROAT & ASTHMATIC COUGH:

Spray a few squirts of SprayNurse directly into the throat. This may help with the typical irritating cough that is being caused by a throat irritation from dry air, having a cold or the result of an infection. Please consult your physician or pharmacist if you suffer from a chronic bronchial cough.

HARMFUL GUT BACTERIA:

For best results - Take 10ml of SprayNurse on an empty stomach and wait 20 minutes before eating or drinking. If you experience nausea from taking it on an empty stomach, it can also be taken after meals.

OPERATION WOUNDS & BEDSORES:

Spray a few squirts of SprayNurse directly on the wound/s or use SprayNurse to wash the wound area by soaking a piece of cotton wool with SprayNurse to softly wash and disinfect the wound area.

EYE ALLERGIES & INFECTIONS:

Spray a few squirts of SprayNurse on a piece of cotton wool & wipe eyes or spray 1-2 squirts of SprayNurse directly on eyes. SprayNurse can also help ease the discomfort of PINK EYE by spraying SprayNurse on your eyes and hands. To prevent pink eye from spreading to others, spray SprayNurse on all objects that are commonly shared/touched by others and spray SprayNurse on each person's eyes & hands in your direct circle of people.

MOUTH ULCERS:

Spray a few squirts of SprayNurse directly into the mouth or lip area where the ulcer occur. **DO NOT RINSE OR WASH THE MOUTH.** Repeat 2-3 times daily. SprayNurse can also safely be used as an oral mouth rinse.

INSECT & SPIDER BITES:

Spray a few squirts of SprayNurse on the affected area/s where the insect bite occurs and let it dry. This might also bring itching relief within a few minutes. It will alleviate the toxins & reduce inflammation, swelling & redness.

CUTS, SCRAPES & MINOR WOUNDS:

Use SprayNurse to cleanse & disinfect cuts, scrapes & minor wounds. No water is needed so SprayNurse can be of great use in rural areas, while traveling or used at outdoor activities. For best results - Soak a piece of gauze or cotton wool in SprayNurse and cover the wound area followed by bandage to keep the gauze in place in order to promote healing and to protect the wound from further harm until the wound reach a stage where it can be left uncovered for natural healthy sunlight exposure.

SKIN RASHES, ALLERGIES & FACIAL LYMPHEDEMA:

SprayNurse can be sprayed directly onto the skin, facial & neck area 2-3 times daily. ALLOW TO DRY. SprayNurse can be used for some types of eczema, depending on the cause of it.

VAGINAL & GENITAL INFECTIONS:

SprayNurse can be effectively used to bring relief to infections in and on all body openings by spraying it 2-3 times daily on the affected area. A 10ml daily doses for internal infections is recommended. Add 20 - 30 ml to bath water when needed.

SPRAYNURSE is an antiviral, antibacterial and antifungal disinfectant.

First-aid kit in a bottle

How SprayNure reacts towards viral infections & supports the immune system.

Studies have shown that the RNA & DNA inside the harmful bacteria cell of the virus, are being destroyed by the ingredients of SprayNurse and forms reactive oxygen, which also attacks and damages the microbes of the virus in multiple areas, which causes up to **90%** reduction in the numbers of harmful bacteria. SprayNurse also reduces infection rates by **58%**. Viruses are quickly inactivated to cause them to be less effective.

SPRAYNURSE is an antiviral, antibacterial and antifungal disinfectant.

IMMUNE HEALTH STARTS IN THE GUT!

SPRAYNURSE ATTACKS HARMFUL BACTERIA, VIRUSES, FUNGI AND INFLAMMATION IN THE GUT

SKIN MICROBIOME PROTECTION

SPRAYNURSE KEEPS "FRIENDLY" BACTERIA ALIVE TO PROTECT, WHILE KILLING HARMFUL BACTERIA. **SPRAYNURSE** ENHANCES THE IMMUNE SYSTEM OF THE BODY AND FIGHTS OFF CANDIDA WHICH COMPROMISES THE IMMUNE SYSTEM. **SPRAYNURSE** DOES NOT EVAPORATE AND REMAINS ACTIVE AND **SPRAYNURSE** IS SAFE FOR INTERNAL AND TOPICAL USE.

SPRAYNURSE will alleviate the harmful effect, such as skin dryness, redness, itching and even peeling caused by alcohol based sanitizers. SprayNurse can also be used as a safe & effective hand sanitizer that offers skin microbiome protection.

REDUCES
up to **90%**
of Harmful Bacteria
& Infection rates
up to **58%**

AMPUTATED LEG

★★★★★

My dogtertjie (10) se regterbeentjie is deur die knie geamputeer. Die inwendige steke het uitgesweer en 'n redelike lelike gat gemaak.

Die steek is verwyder en net *SPRAYNURSE* is gespuit en teen die 3de dag was die wond toe. Die wond was nat en gevoelig en ek het elke oggend en aand net met *SPRAYNURSE* skoongespuit en laat droog word, geen salwe gebruik nie en die wond het sonder komplikasies gesond geraak. (21/9/2016 - 28/9/2016).

Ons gebruik dit ook wanneer ons voel ons begin verkoue kry, dan spruit ons dit binne ons keel en neus en gaan nou al ons 3de winter deur sonder om siek te word. Werk wonders vir mangelontsteking. **Sept 2016**

SR.ANNE-MARIE (Pinelands)

WET INFECTED WOUND

★★★★★

Amazing: I was met with initial hesitation by my mother when I gave her the *SprayNurse* as she has tried so many products to try help this deep, wet infected wound. She ran it past her surgeon and he gave her thumbs up. She has been using it for **4 days now, 3 times a day**. Initially it dried out the wound and when the scabs came off there was a drastic improvement. **June 2019**

LORRAINE (Matron at Sunnyside Lodge - Plumstead) 083 462 0792

MOSQUITO BITES / WOUND

We have found it is very good with mosquito bites. Debbie uses it for her eczema. It does not itch as much. We are using *SPRAYNURSE* to clean a wound. It's a deep fistula but with using this we find the wound to be very clean although we still continue to use the dressing packs as prescribed where we were struggling as it was oozing badly it is no longer doing that. The sisters working with me are impressed with the results of *SPRAYNURSE*. **June 2019**

TAHLIA (STELLENRIDGE)

WOUNDED KNEES

Toe ek neerslaan met my poegie, was die eerste gedagte wat by my kop opkom dat hierdie wonde lelike merke gaan los. Min het ek geweet dat mens so iets 'amazing' kry soos SprayNurse. Ek kon binne dae 'n verskil sien op my knieë en die merke wat vandag sou sit is lank vergete. Ek is dankbaar ek het SprayNurse gevind. **Jan 2013**

BABALWA (ENGEN BRACKENFELL)

TONSILS / FLU

SprayNurse is a very good product. We get 10ml to drink everyday at work and I also sprayed it in my throat 3 times per day and it helped me with my tonsils and flue. **April 2020**

KARINA K

ASTHMA

I love that I can use it both internally and externally. It's helped me with my asthma a lot. Not getting sick so much anymore. I can't live without this product, I use it for basically almost everything. Would definitely recommend it. **April 2020**

BONGIWE (ENGEN BRACKENFELL)

HELPED WITH FLUE SYMPTOMS

I work at Engen Brackenfell and I started feeling as if I was getting flu symptoms and a sore throat, but noticed that it disappeared quickly when I used SprayNurse. This happened twice and it worked every time. Every morning they give us a spoonful of Spraynurse at work. **April 2020**

LAETITIA (TOTUIS LAERSKOOL)

GENERAL WOUNDS / SCHOOL FIRST AID KID

SprayNurse is regtig uitstekend. Dit lyk soos water, dus is die kinders nie bang dit sal dalk brand nie. Dit is gerusstellend om te weet dit ontsmet die seerplek deeglik en jy kan maar baie gebruik op vuil voetjies se stukkende tone ;-), want dis bekostigbaar. Dit moet genesende effek hê, want ek het al 'n paar keer op seerplekke gespuit wat later glad nie meer so erg seer gelyk het nie. Onlangs het ons daarvan op 'n kind se oog gespuit. Hy was deur 'n maatjie met 'n plastiek keël geslaan. Daar was 'n stukkende merkie net onderkant die binne hoek van sy ogie. Die ogie het nie geswel of blou geword nie. Dit het die volgende dag net gelyk soos 'n klein krapmerkie. Dit is uitstekend om sand uit kinders se oë te spoel. Alle skole behoort dit in hul noodhulpkissie te hê. Ons bestel gereeld en hou 1 vir elke klas aan. Die kinders hardloop vir enige seerplek na juffrou toe en dit bring vinnige verligting. Ons gebruik dit al sedert 2016. **Jan 2018**

SIMONE (BRACKENFELL)

ECZEMA / EAR INFECTIONS

I have been using SprayNurse for a few years now. I carry it in my bag at all times in case of emergency. My friend had a bad case of eczema on her scalp, this cleared it in days. Another one had ear infection and again I left her some, she sprayed it onto cotton wool and slept with this in her ears and there was improvement. She continued with that for 2 to 3 days. I'm also using it for sore throat. A must-have product! **March 2014**

MARIETTE (BONHEUR FRAILCARE)

PRESSURE SORES / BED SORES

I am a nursing manager at a retirement village and was introduced to SprayNurse by a colleague. One of our residents is on a waiting list for a hip replacement. In the meantime she is wheelchair bounded which means that she, when not lying down, has to sit in her wheelchair (which is a size too small, to enable her to go through the door). Needless to say, she developed pressure sores. We treated this with ointments, but with poor results. Actually, it has worsened. I discussed it with my manager who suggested we use SprayNurse. After using it for 2 weeks, the staff nurse asked me if I'd seen the sores recently. I couldn't believe my eyes when I saw the skin was dry with a normal pink colour. I will make sure to always have Spraynurse at hand. No nurse should go without SprayNurse! **Jan 2019**

CARIN (DURBANVILLE)

WOUNDED TOE / SUN BURN RELIEVE

SprayNurse het my Desember vakansie gered. Met 'n kamp kry kinders baie vinnig 'n stukkende toon of 'n krap plekkie. Ek het SprayNurse op almal gespuit en kinders was mal daarvoor omdat dit nie brand as mens dit skoonmaak nie. Ek sal dit vir almal aanbeveel. Werk soos 'n bom. **Mar 2018**
